

SCRATCH-OFF RIBBON

Cover and Discover Data

The Scratch-Off monochrome ribbon produces a grey effect that can be scratched-off after being applied on a card. This feature is ideal for covering a gift card value or confidential code.

ADVANTAGES

With the Scratch-Off ribbon, important information are protected and discovered by the holder.

Thanks to the ribbon saver feature, available with continuous ribbons, you significantly increase the number of cards to be printed with one single ribbon. Indeed, the surface used on the ribbon corresponds to the real printed surface plus a 7 mm (0.27") jump and not the surface of a whole card.

Tested and validated by Evolis R&D and Quality departments, these consumables bring you printing quality and reliability.
